Keeping Your Students and Your Funding Healthy

Everyone knows healthy students learn better, which leads to higher proficiency test scores; but as more and more funding is based on average daily attendance absenteeism has become not only a health issue but an economic one. On average an absent student cost \$40 per day per student in lost funding. Last year nearly 22 million school days were lost due to the common cold alone. Add the cost of substitute teachers and staff and it's easy to see the impact of germ related illness on funding.

Kill Germs Where They Live

Hand washing programs have had a measurable effect in decreasing absenteeism but as soon as the student touches any surface the hands are contaminated again. SaniGuard® kills the germs on the surfaces where they flourish and because it dries-on-contact there is no need to wipe or rinse.

Stop the Spread of Germs That Cause Meningitis, Staph, Strep & Influenza

SaniGuard® Dry Sanitizing Surface Sprays and Total Release Foggers can be used everywhere in your school to stop the spread of germs. SaniGuard® Spray can also be helpful in sanitizing high usage objects, known as germ "hot spots" such as:

- Door Handles
- Water Fountains
- Toilet Seats
- Telephones & Office Equipment
- Computer Keyboards and Mouse
- Headphones and Musical Instruments
- School Busses and Transportation Vehicles
- Gym and Athletic Equipment
- Toys and Games
- Lockers

Use SaniGuard® to kill the bacteria, fungi, and viruses that cause life threatening diseases in college dorms; such as norovirus, meningitis, and strep.

Protect Student Athletes

Athletic Departments and student athletes are feeling the affects of harmful germs. Whether wrestling, football, basketball or baseball, all shared athletic equipment creates a breeding ground for infection.

Kill germs before infections can spread—which can lead to hospitalization and even death in some cases.

SaniGuard® kills 99.99% of:

- MRSA
- Mat Herpes
- Meningitis
- Hepatitis
- Ring Worm
- Strep

Safe & Effective

SaniGuard® is EPA registered and effectively kills germs, bacteria, and viruses on contact.

The SaniGuard® Total Release Fogger allows you to sanitize an entire room in just minutes and has the same germ killing power as the spray. Perfect for larger "hot spot" areas such as locker rooms, rest rooms, the nurse's office, and the classroom.

SaniGuard® is also safe for food contact surfaces (no potable rinse required), so even heavy germ areas like cafeterias and kitchens can be easily treated against bacteria like E-Coli and Salmonella.

To order please contact your local distributor or DEM Technology, LLC. • Phone: (937) 223-1317

SaniGuard® Kills 99.99% Of:

- Influenza
- Avian Influenza
